STORIES

Harmony's journey with Matimba:

Renewable energy meets community impact

CONNECT WITH US

APRIL 2025

Harmony has been steadfast in its commitment to environmental sustainability and reducing its carbon footprint.

A significant milestone in this journey has been the collaboration with Matimba Yeru Energy, a local renewable energy solutions provider, to implement renewable energy initiatives at the Phakisa gold mine.

Founded in 2017, Matimba Yeru Energy is a homegrown success story, led by electrical technologist Sibusiso Mathebula and sales expert Cherise de Lange.

Together, they've built a company that manufactures and assembles LED lighting and solar systems, supports local manufacturing, and uplifts communities with the projects they undertake.

Matimba Yeru Energy highlights

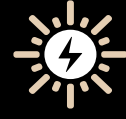

Designs and installs tailored solar energy systems

Build high-performance, locally made LED luminaires

Empowers South Africans through job creation, skills development, and support for local manufacturing

Offers full-service renewable energy solutions

At Phakisa mine, Harmony's partnership with Matimba marked an important step in our renewable energy journey. Matimba played a key role in designing and delivering high-quality solar solutions that support Harmony's goal of reducing our carbon footprint while ensuring energy resilience at our operations.

From supplying luminaires to supporting compliance with regulatory approvals, Matimba helped shape a renewable solution tailored to the unique conditions of the Phakisa site. Their work speaks not only to technical brilliance, but also to a deeper commitment to building a more sustainable South Africa.

This partnership goes beyond solar panels and lighting, it's about people, investing in local businesses, unlocking opportunities, and building a greener legacy, together.

With Matimba at our side, Harmony is proud to shine a light on what's possible when purpose and partnership power progress.
