

The festive spirit is alive!

FEBRUARY 2026

Harmony-sponsored sports tournaments kick off across three regions

The Harmony sponsored festive sports tournaments officially kicked off in three of our operating regions: Gauteng, North West and the Free State – bringing excitement and unity to host communities.

The opening matches took place in Theunissen, Khutsong Township, Kraaipan Village in Masilonyana, Merafong, and Ratlou local municipalities, marking the start of a series of fun and competitive games aimed at promoting social cohesion and youth development.

The tournaments, a long-standing tradition in Harmony's community engagement strategy, feature multiple sporting codes including football, netball, chess and athletics. These events provide a platform for over 2,500 young people across all ages to have fun while showcasing their talents to local scouts, creating opportunities for professional growth while strengthening community ties.

Speaking on the significance of these tournaments, Dr Mashego Mashego, Executive Director: Stakeholder Relations and Corporate Affairs emphasised their impact:

"These festive tournaments are more than just games; they are a catalyst for social cohesion and economic stimulation in our host communities. By supporting these initiatives, we uphold our commitment to sustainable development and create a platform where youth can be active and thrive."

In addition to supporting youth development and community building through sports, our investments in the tournaments boost local economies through the procurement of:

logistics

catering

sporting gear

This initiative reinforces Harmony's role as a responsible corporate. With an investment of just over R1.5 million, the company continues to align its efforts with Sustainable Development Goals.

The festive spirit is alive, and Harmony continues to partner with local Non-Profit Organisations to deliver memorable experiences while building stronger, united communities.

We are committed to ensuring our host communities benefit in meaningful ways that ensure long-term growth and sustainability beyond our operations.
